

High Pressure Resin Adhesive

Clear and Red

- Low Odor
- High Strength
- High/Low Temperature Resistance
- Waterproof
- Non-Staining
- Reduces Telegraphing
- Non-Flammable
- Bonds Plastic Laminates Including Edgebanding and Melamine® Type Surfaces

At Westtech, our efforts are focused on producing high quality, industrial strength adhesives. We sell our products in a wide variety of markets at a competitive price. With a profound understanding of our customers' needs and years of industry experience, we continue to develop new products and applications to serve our current and future customers.

Westtech's HPRA spray adhesive was specifically designed to provide permanent bonding of materials for a variety of applications.

- Bonds semi-lustrous and lustrous surfaces
- Bonds veneers with and without phenolic backing material
- Adheres to many films
- Good bonding of thermal films helps reduce telegraphing of thin films and veneers

Westtech's self contained, environmentally friendly, portable canister system was designed for ease of use. The canister, equipped with a reusable hose and gun, eliminates the need for air-assisted adhesive application systems. This approach significantly reduces worker set up and general maintenance time. Its portability enables you to apply adhesive in your facility as well as on the job site. This product is also available in small handheld aerosol cans.

HPRA provides a fast tacking, strong, permanent and waterproof bond.

- High Tensile Strength
- High Peel Strength
- High Temperature Resistance Level of Bonding

Technical Data

Westtech emoA product is specifically formulated as a high strength/temperature industrial adhesive applicable to a variety of substrates.

Technical Data:

- Contains NO CFCs
- Non-Flammable

Performance Features:

- Formulated for rapid application
- Simple clean up with AR adhesive remover
- Bond can withstand heat and humidity
- Applies easily and adheres to various substrates

Safety Recommendations:

Vapors may be harmful to health. Keep away from children. Use only in well ventilated areas or use respiratory protection. The product MSDS should be read and understood before use. Eye protection is required. This product is not flammable.

Recommended Usage:

Westtech emoA is specifically formulated to be a high strength, high temperature industrial adhesive applicable to a variety of substrates. This adhesive is suitable for use in many different industries such as woodworking, furniture, high-pressure laminates, edgebanding, marine, RV, automotive headliners, upholstery and construction, just to name a few.

Prior to use, a small test patch should be sprayed to evaluate substrate compatibility. This product may degrade some thin plastics and films. Some of the materials Westtech emoA will effectively bond include plastic laminate, edgebanding, automotive headliners, glass, particleboard, felt, paper products, carpet, duct insulation, steel, aluminum, molded fiberglass, wood, urethane foam and many other materials.
